AUTHOR I. O. Angell Stone circles: Megalithic Mathematics or 189 Neolithic Nonsense? James Brunton The envelope of an ellipse 118 F. J. Budden Functions which permute the roots of an equation 24 B. D. Bunday Some thoughts on a coin-tossing problem 108 John Cable Who's afraid of the measuring numbers? 81 J. W. S. Cassels Is this a Recorde? 59 R. H. Cobb Problems, solved and unsolved R. H. Cobb Problems: comments, corrections and further 284 solutions Tony Crilly A circular vector space 115 "Quinbus Flestrin" On mountain tracks and motorways, men and mandarins 198 T. J. Fletcher Speedway tournaments 256 R. L. Goodstein Arithmetic without sets (Presidential address 1976) 165 D. R. Green The historical development of complex numbers 99 J. V. Greenman Graphs and determinants 241 Stanley Gudder We don't do things like that in our set 273 P. Harvey A problem of astronomical proportion 263 C. W. Kilmister Population in cities 11 Bryan Lang & Multiplicative groups of singular matrices 38 Hans Liebeck R. C. Lyness An Olympiad problem 90 John Pym An approach to convergence 57

AUTHOR	TITLE	PAGE
Keith Selkirk	Re-designing the dartboard	171
G. C. Shephard	Additive frieze patterns and multiplication tables	178
Ian Stewart	The truth about Venn diagrams	47
Robert L. Tennison	Smooth curves of constant width	270
R. C. Walker	A graph-colouring theorem	54
R. C. Walker	Monge's theorem in many dimensions	185
D. R. Woodall	Teaching through discussion groups	194
G. T. Woods	Chemically, the same or different?	247

Notes

March	60.1-60.4
June	60.5-60.16
October	60.17-60.29
December	60.30-60.37

Author	No.	Trile	PAGE
Derek Ball	60.6	Some probabilities in the simple race game	125
D. A. Barwick	60.31	φ sequences	293
David E. Bell	60.21	Walk or run in the rain?	206
M. T. L. Bizley	60.16	Another approach to the impossible scores problem	139
Jacob A. Brandler	60.26	An application of unique factorisation	
		domains to an irrationality problem	215
F. J. Budden	60.28	Symmetry operations on molecule models	218
F. Chorlton	60.4	A new approach to some trigonometric	
		identities	65
F. Chorlton	60.37	The ladder problem	297
A. M. Cohen	60.36	Pascal matrices: a postscript	296
H. Martyn Cundy & M. J. Wenninger	60.27	A compound of five dodecahedra	216
James D. Fabrey	60.11	The power formula for integrals	134
H. M. Finucan	60.2	An elementary proof of the Simpson error	63
H. M. Finucan	60.15	Double your money	138
P. Fitzpatrick	60.29	The impossible scores problem by modular arithmetic	219
A. A. Fletcher	60.5	Odds on the champion	124
G. A. Garreau	60.34	Problems from the past	295
J. W. Gubby	60.3	Two chestnuts (re-roasted)	64
T. J. Heard	60.1	Counting the rationals	62
Chung-Wu Ho	60.10	Decomposition of a polygon into triangles	132
M. Lewin	60.13	A new proof of a theorem of Erdös and	I rungilli.
		Szekeres (see also p. 298)	136
M. Lewin	60.14	The theorem that \sqrt{n} is either irrational	1,22 .8
		or integral	138

Author	No.	TITLE	PAGE
M. Lewin	60.33	An even shorter proof that \sqrt{n} is either	
		irrational or integral	295
G. S. Light	60.22	Are mudguards necessary?	208
Aileen M. Mcloughlin & Gerrit J. Smith	60.23	Obtaining Keplerian orbits	209
G. I. Owen	60 35	Log jam	296
A. R. Pargeter	60.17	The volume of a cone	203
E. J. F. Primrose	60.30		292
Arnall Richards	60.20		205
Geoffrey R. Robinson	60.12	A diophantine solution	136
Frank Sandon		A nomogram for the times of sunrise,	
D I D C	(0.10	sunset and twilight	210
R. J. P. Scott	60.18	-	203
Man-Keung Siu		An interesting exponential equation	213
J. B. Sutton	60.7	11	126
Danield Watern	60.0	distribution (see also p. 298)	128
Donald Watson	60.8	Kombinatorial mechanics	294
J. D. Weston	60.32	Square roots in rings	294
William Wynne Willson	60.9	A generalisation of a property of the 4, 5, 6 triangle	130
Michael Worboys	60.19	The geometric series—a geometric demonstration	204
